

Ahmed Sinan Hayder

Software Engineer

Iraq, Mosul | +964 771 344 1804 | xonindev@gmail.com | [GitHub](#) | [LinkedIn](#)

Education

Computer Science | Software Engineering | University of Mosul, Iraq, Mosul
Sep. 2022 - 2026

- Comprehensive studies in coding, data structures and algorithms, computer architecture, networking, software engineering, and intelligent systems.
- In-depth exploration of the software development lifecycle, covering requirements engineering, software design, development, testing, deployment, and maintenance.

Experience

Frontend Developer | Aswar Group | Oct. 2025 - Present

- Built Vue.js frontends integrated with Milestone XProtect surveillance systems, and developed Scanner Bridge—a multi-layered document capture solution using TWAIN/WIA protocols, WebSockets, and a unified digital intake workflow.

Frontend Developer | Al-Noor University Center for the Preservation of Cultural Heritage | June 2025 - Present

- Built a responsive landing page and internal dashboard for Alnoor Center/Discover Mosul, featuring role-based auth, user management, and a CMS, while integrating Tidio's AI-powered live chat into the mobile app.

Frontend Developer | QAF Lab | June 2025 - Sep 2025

- Wrote and maintained a comprehensive frontend test suite covering unit, integration, and E2E tests, with CI/CD automation, mocking, performance checks, and clean, refactored test practices.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, PHP, and C/C++

Frameworks : React.js, Vue.js, Astro, Next.js, Filament (Laravel), Strapi

Others: Vite, Shadcn, MUI, CICD, Docker, Git, Postman, PostgreSQL, MySQL, Milestone Systems

Honors, Awards, and Competitions

- **HurryApp Hackathon (2025) Finalist. Baghdad**
- **University of Mosul CTF (2025) Finalist. Mosul**
- **IRCPC (2023) 1st. Baghdad**

Projects, International Collaboration & Volunteering

Project Week – Brandenburg University of Applied Sciences, Germany (2025)

- Participated in an international project week on 3D documentation, gaining hands-on FARO Focus laser scanning experience through fieldwork at the Brandenburg Museum to produce precise digital heritage models.

Digital Heritage Documentation Project – Iraq & Germany (2025)

- Contributed to an international multi-university research project digitally documenting the UNESCO-listed Al-Chibayish Marshes, involving field photogrammetry data collection, 3D model integration, and website optimization.

Digitalisation of Cultural Heritage Workshop – University of Potsdam, Germany (GI-Festival 2025)

- Participated in an international cultural heritage digitalization workshop, contributing to VR and AR gallery projects with the Universities of Mosul and Al-Noor, showcasing immersive Iraqi heritage experiences.
